

TeleMED Unveils New Website to Mark 10th Anniversary of Serving the Canadian Healthcare Community

(Toronto) Telemed Diagnostic Management Inc. (TeleMED) today launched its new website to mark a decade of serving the Canadian healthcare community.

Since its incorporation in 2000, the company has been the pioneer in technology solutions for the management of ECG and other non-invasive tests. Each year, medical laboratories use TeleMED technology to process over 1 million tests, at over 700 locations across Canada.

The Company's new website reflects the opportunities that it sees for future growth: expansion in the variety of tests that can be managed using *ViTELflo* platform and expansion beyond its traditional base of community medical laboratories. "We believe that we have only scratched the surface of the opportunities that are available for us", said Stephen Chernoff, TeleMED's Director of Marketing & Sales. "There has been an explosion in the number of inquiries that we get for secure, efficient mobile testing solutions. However, we also see a need in the areas of clinical research, executive health and smaller hospitals and clinics."

About TeleMED

Since its incorporation in 2000, TeleMED has been a pioneer in telehealth technology solutions for the management of ECG and other vital-sign tests. Each year, medical laboratories use TeleMED technology to process over 1 million tests, at over 700 locations across Canada. TeleMED's cost-effective solutions accelerate test processing cycles by days, relieve clinicians from the burden of administrative tasks and improve the precision and integrity of test data. Headquartered in Ontario, TeleMED maintains offices across Canada, including Toronto, Edmonton and Vancouver.
