

**Spirometry is under utilized in Ontario ... 11.4% of people over the age of 35 have COPD. A jump of 15% since 2008.**

**Reuters, 2014**

### **Who should be tested:**

- Those who are over 40 and smoke (or use to)
- Those who cough regularly
- Those who experience shortness of breath or wheezing during mild exertion
- Those who get frequent colds that last longer than others

### **About TeleMED**

We are Telemed Diagnostic Management Inc., Canada's leader in delivering innovative solutions for the electronic management of non-invasive diagnostic data.

### **We Also Simplify:**

- ECG
- Holter monitoring
- Ambulatory Blood Pressure
- Loop

**Partner with TeleMED to get our new technology and easy access to respirologist working for you!**

### **Doctors Benefit Through:**

- ◆ Easy Access to Respirologist
- ◆ 24hr Turnaround Time for Diagnostic Tests Results
- ◆ Eliminating Unnecessary Wait times
- ◆ 5-7 min to Administer Tests
- ◆ Cost Effective Solution
- ◆ Generating New Revenues Without Increasing Expenses
